Summary

Flutter Developer with hands-on experience building production-ready, cross-platform mobile applications using Flutter, Dart, Riverpod, and Firebase. Developed a full-stack AI career platform (PrepMateAi) featuring real-time PDF generation, REST API integration with a Django backend, and Clean Architecture. Passionate about writing maintainable, scalable code with strong foundations in DSA, OOP, and state management.

Technical Skills

Mobile Development: Flutter SDK, Dart, Cross-Platform (Android/iOS), Responsive UI, Material Design, Custom Widgets

State Management & Architecture: Riverpod, Provider, MVVM, Clean Architecture

Backend & APIs: REST APIs, JSON Parsing, Firebase Authentication, Firebase Firestore, Firebase Cloud Messaging (FCM), Django

Languages & Databases: Dart, Java, Python, SQL, SQLite, PostgreSQL

Tools: Git, GitHub, Android Studio, VS Code, Postman, Docker

Projects

PrepMateAi — AI Career Platform | *Flutter, Dart, Django, Riverpod, REST APIs* **Feb 2026 – Mar 2026**

- Built a **full-stack cross-platform mobile app** (Android & iOS) using Flutter, MVVM architecture, and Riverpod — fully functional from a single codebase.
- Engineered an **AI-powered Resume Builder** with real-time preview, on-device PDF generation, and ATS score analysis that surfaces actionable improvement feedback for users.
- Designed and consumed **10+ REST API endpoints** with a Django backend for user authentication, resume data sync, and analytics — handling token refresh and error states gracefully.
- Architected with **Clean Architecture** (data / domain / presentation layers), reusable widget library, and async programming patterns — reducing future feature development time significantly.
- GitHub: github.com/provikash/prepMateAi

Vibely — Real-Time Messaging App | *Flutter, Firebase, Firestore, FCM, Riverpod* **Feb 2025 – Mar 2025**

- Developed a **real-time one-to-one chat application** with sub-second message delivery using Cloud Firestore streams and Flutter's reactive UI model.
- Implemented **dual authentication flows** — Email/Password and Google OAuth via Firebase Auth — with secure session persistence and proper sign-out handling.
- Integrated **Firebase Cloud Messaging (FCM)** for push notifications, ensuring users receive messages even when the app is in the background or closed.
- Managed **complex async state** across chat streams, auth states, and notification events using Riverpod, maintaining clean separation of UI and business logic.

Education

Bachelor of Technology (B.Tech)

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Expected: 2026

Uttar Pradesh, India

Intermediate (Class XII)

Uttar Pradesh State Board (UP Board)

2022

Certifications & Achievements

- **AI Internship Certification — Edunet Foundation (AICTE & Shell):** Completed an industry-aligned AI program; applied machine learning concepts to real-world problem-solving scenarios.
- **Google Developer Groups (GDG) Solution Challenge:** Built and presented a software solution at the campus level, competing with peers on innovation and technical execution.
- **AKTU AI Tech Confluence:** Participated in a university-level symposium on emerging AI technologies, engaging with industry speakers and researchers.
